INTRODUCTION
West Sumatra consists of a variety of ethnic groups and cultures. Each ethnic group in West Sumatra creates, disseminates and passes on its own culture from one generation to the next. The diversity of ethnic groups, traditions and culture essentially provides a special identity and becomes capital. basis for cultural development. Each region in West Sumatra has different cultural characteristics such as the Mandoa Katampek and Ratik Tagak traditions.

According to Koentjaraningrat (1954: 103) Tradition or custom is something that has been done for a long time and is part of the life of a group of people, usually from the same country, culture, time or religion. The most basic thing about tradition is the existence of information from generation to generation, both verbally and in writing, because without this, a cultural tradition will become extinct. Traditions are considered as tools, beliefs and habits of a society for certain activities which are believed to have real power and influence on life so that they are always carried out from time to time. Humans as social creatures cannot walk alone and depend on each other. These social needs can be channeled to the traditions carried out by the community, and not all existing traditions that will survive in people's lives are traditions that have been passed down from generation to generation.

Based on initial observations, the author observes that not all areas in West Sumatra, especially in Jorong Sikaladi Nagari Pariangan, carry out the Mandoa Katampek and Ratik Tagak traditions on Rayo Anam Day.
